### Paragraphs

#### 1- Are you for or against online shopping?

Shopping online is great! Firstly, it saves time. Most people don't want to spend much time travelling to the shops. They can stay at home and buy the things they want in a few minutes. Secondly, they have more choices online. Also, if more people shop online, there will be fewer cars on roads and less pollution! However, some people don't like online shopping. They like to try the things they are buying first. Also, they don't like to waste time waiting for a delivery.

#### 2- How do you think life will change in the future?

What will happen in the future? This is a question most of us ask. For me, I think travelling in time will be impossible. I don't think we will live on the moon. It's impossible. I think we'll have flying cars. I hope we will have no illnesses. I think scientists will explore the bottom of the sea. They may discover new animals and new kinds of fish. I think life in the future is still a secret.

#### 3- Life in the future (Azhar)

Technology changes the world. People will use social media more than they do today. They will be able to travel in time by using time machines. They will have flying cars. They will live on the moon.

#### 4- Positive and negative sides of using technology

Using technology has become very important in our life. Most of our daily activities need technology. Using technology is sometimes positive. It saves effort and time. The negative side of using technology is that it sometimes wastes our money and time. Playing computer games is an example of that. But should schools use computer games in the classroom? I think it'll be positive if that is related to teaching children. They will be more interested and excited, but this should be controlled well.

#### "Online shopping"

Some people prefer shopping online, but others don't prefer it. Most people think that online shopping is great. It saves time. People don't need to spend lots of time travelling to the shops. They can stay at home and buy the things they want in a few minutes. They have more choices online. If more people shop online, there will be fewer cars on the road and less pollution. Old people can do all their shopping online. On the other hand, other people don't like online shopping. They prefer going to real shops. At a shop, they can see what they are buying and they can try it first. They don't like to waste time waiting for a delivery. They think that if everyone shops online, many shops will close. If they close, then lots of other businesses like cafes will close, too.

## C. Reading Comprehension

## 3 Read the following, then answer the questions:

In Ancient Egypt, people used sundials, which use the position of the sun, to tell the time. In the year 1524, a scientist from Damascus called Taqi al-Din invented a watch that looked like the watches of today. It had three hands to show hours, minutes and seconds. It was also small, so people could carry it with them. But watches today don't only tell you the time. Some watches will say that you should do exercise if you are sitting at a computer for a long time! And some have apps, such as maps, that will give you directions if you are lost. Watches of the future will be like modern mobile phones. If someone calls you, you will be able to see them on a special video screen. And some will look after your health. They will tell you what medicine you can take if you are ill, or that you should see a doctor.

### Injy - I love online shopping!

Shopping online is great! **Firstly**, it **saves** my time. I don't want to spend lots of time travelling to the shops. I can stay at home and buy the things I want in a few **minutes**. **Secondly**, I have more choice online. Also, if more people shop online, there will be fewer cars on the road and less **pollution**! I will do all my shopping online when I am older.

### Baher - I prefer going to real shops in my city

Every time I buy **clothes** online, the thing that I buy is **wrong**! At a shop, I can see what I am buying and I can try it first. Also, I don't like to **waste** time waiting for a **delivery** – I want things now! If everyone shops online, the shops in our town and cities will close. If they close, then lots of other **businesses** like cafes will close, too.

**Sawsan** : I think that is an amazing invention. I hope they will build lots of these in Egypt. We have lots of sun and we could make lots of electricity.

## Reading (1)

By H G Wells **The Time Machine**

### London, England, 1895

A group of friends meet for dinner at the Time Traveller's house. After dinner, the Time Traveller asks his friends if they think that it is possible to travel through time. "It's impossible!" they reply, "We can only travel through space, not time". The Time Traveller shows them a small model of a machine that he has in his hand. "This is a copy of a machine that I believe can go through time. It took me two years to build", he tells them. The friends laugh. "Pull this lever," he tells one of them. They feel some wind and then the machine suddenly disappears! "Where is it?" the other men ask. "The model machine is in the future," the Time Traveller says. "Would you like to see the real machine?" he asks. He takes them to another room. Inside the room is another, bigger machine. It is not finished. "In this machine," he says "I will explore the past and future!"

#### Listening Text

Debate about : **All computer games are bad for you**

**Hanan** : Do you think that all computer games are bad for you, Lama?

**Lama** : In my view, not all computer games are bad. Some of them can help you to learn things.

**Hanan** : I agree. If you don't play computer games all the time, it shouldn't be a problem.

**Lama** : In my opinion, playing games late at night stops you sleeping.

**Hanan** : I agree. It is not a good idea to play games late at night though.

**Lama** : Yes, It's a good idea to only play quiet, calm games in the evening.

**Hanan** : If you only play games that teach you things in the evening, it should be fine.

#### Videoscript

**Narrator** What do you use when you want to find out the time?

Do you use a watch or do you use a clock?

These clocks either use numbers to tell the time or they use hands. These hands show hours, minutes and seconds. But how did people know the time in the past? In Ancient Egypt, people used sundials. Sundials use position of the sun to tell the time. Then, in the year 1524, a scientist from Damascus called Taqi al-Din invented a watch that looked like watches of today. It had three hands to show hours, minutes and seconds. It was also small, so people could carry it with them.

But watches today don't only tell you the time. Some watches will say that you should do exercise if you are sitting at a computer for a long time! And some have apps, such as maps, that will give you directions if you are lost. What will the watches of the future be like? Some will be like modern mobile phones. If someone calls you, you will be able to see them on a special video screen.

And some will look after your health. They will tell you what medicine you should take if you are ill, or that you should see a doctor.
